Re: Compliance Letter
Vernitron Piezoelectric Division
OHD 052 324 290

Dear Mr. Kupcak:

On June 26, and July 5, 1989, the Ohio Environmental Protection Agency (OEPA), representing the United States Environmental Protection Agency (U.S. EPA), conducted a Resource Conservation and Recovery Act (RCRA) inspection of the above referenced facility. The purpose of the inspection was to determine the compliance status of this facility with respect to the applicable hazardous waste management requirements of Chapter 3734 of the Ohio Revised Code, and also the land disposal restriction regulations as set forth in 40 CFR Part 268 and in revisions to 40 CFR Parts 260-265, 268, 270, and 271.

As a result of the inspection, it appears that the subject facility is in compliance with the land disposal restriction regulations found in 40 CFR Part 268.

Thank you for your cooperation. If you have any questions concerning this letter, please contact Gordon Garcia of my staff at (312) 886-8097.

Sincerely yours,

CERTIFIED MAIL

Ken Kupcak
Vernitron Piezoelectric
232 Forbes Road
Bedford, Ohio 44146-5478

Dear Mr. Kupcak:

The purpose of this letter is to summarize the results of my recent RCRA inspection of your facility, which occurred on June 26, 28, and July 5, 1989. This inspection was conducted in order to determine your facility's compliance with State and Federal hazardous waste rules and regulations. Cas Stevens and yourself represented Vernitron Piezoelectric. Robert Finkelstein of Toxcon Engineering attended the July 5, 1989 meeting and also represented Vernitron Piezoelectric. Sherry Slone, who was present on June 28, 1989, and myself represented the Ohio EPA.

The following violations were noted during the inspection:

1. Rule 3745-52-20(C) of the OAC and 40 CFR 262.20(b), because Vernitron failed to ship their hazardous waste to a facility that is permitted to handle the waste describe on the manifest;

The silver/tetrachlorethylene waste is sent for reclamation to Eastern Smelting and Refining located in Lynn, Mass. This facility is not permitted to receive this waste since this waste is a land ban waste.

2. Rule 3745-52-33 of the OAC and 40 CFR 262.33 because Vernitron failed to offer to placard the initial transporter of hazardous waste.
3. Rule 3745-52-34(A)(3) of the OAC and 40 CFR 262.34(a)(3), because Vernitron failed to clearly mark containers with the words "Hazardous Waste";

Two containers of hazardous waste not marked with the words "Hazardous Waste" were noted in the area of the hazardous waste nickel plating solution container storage area.

4. Rule 3745-52-34(A)(2) of the OAC and 40 CFR 262.34(a)(2), because Vernitron failed to clearly mark containers with accumulation dates;

Seven containers of hazardous waste without accumulation dates were noted in the area of the hazardous waste nickel plating solution container storage area.

5. Rule 3745-55-73(A) of the OAC and 40 CFR 265.173(a), because the facility had drums containing hazardous wastes which were stored opened.

Containers of hazardous wastes were stored opened at the hazardous wastes storage area located near the receiving dock and at the satellite accumulation area outside the nickel plating room.

6. Rule 3745-66-74 of the OAC and 40 CFR 265.174, because Vernitron has failed to conduct weekly inspection of the drum storage areas for evidence of leaks or corrosion and failure to document inspections.

Documentation shown during the inspecting indicates that the drum storage areas have not been inspected since June 30, 1988.

7. Rule 3745-52-34(C)(1)(b) of the OAC and 40 CFR 262.34(c)(1)(ii), because the facility failed to have a drum containing hazardous waste at its satellite accumulation station marked with the words "Hazardous Waste".

The drum outside the nickel plating room was not properly marked as containing hazardous waste.

8. Rule 3745-52-41 of the OAC, because the facility has failed to submit an annual generator report to the State.
9. Rule 3745-65-37(A) of the OAC and 40 CFR 265.37(a) because Vernitron has failed to make the appropriate arrangements with local authorities;

Vernitron needs to familiarize local authorities with the types of wastes handled at this facility and associated hazardous of the waste.

10. Rule 3745-65-52 of the OAC and 40 CFR 265.52, because Vernitron has failed to maintain a contingency plan as required and must provide":
 - a. Arrangements agreed to by local police department, fire department, hospital, contractors and state and local emergency response teams to coordinate emergency services.
 - b. List of names, addresses and phone numbers of all persons qualified to act as emergency coordinator. One person must be designated as the primary emergency coordinator.
 - c. A list of all emergency equipment, the location of the equipment and a physical description of each item on the list.

11. Rule 3745-65-54(A) of the OAC and 40 CFR 265.54, because the facility has failed to amend the contingency plan as the result of changes in the list of emergency coordinators and the list of emergency equipment.
12. Rule OAC 3745-65-53(A),(B) and 40 CFR 265.53, because facility has failed to forward copies of the contingency plan to local and state emergency service authorities.
13. Rule 3745-65-16 of the OAC and 40 CFR 265.16, because the facility has failed to provide an adequate personnel training program.
14. Rule 3745-65-16(B)(C) of the OAC and 40 CFR 265.16(b)(c), because the facility has failed to provide the required annual hazardous waste training for its employees.
15. Rule 3745-65-16(D)(E) of the ;OAC and 40 CFR 265.16(d)(e), because Vernitron has failed to maintain for each employee involved in the handling/management of hazardous waste records of their job titles, job descriptions and documented employee training records.
16. Rule 3745-58-60(C)(1-3) of the OAC and 40 CFR 266.70(c)(1-3), because the facility failed to document the amount of recoverable precious metal;
 - a. stored at the facility at the beginning of the calendar year;
 - b. generated during the calendar year;
 - c. stored at the facility at the end of the calendar year.

Please address the above generator violations and submit related documentation within 30 days of receipt of this letter.

Storage Violations:

1. Facility does not have an adequately written waste analysis plan as required by 40 CFR 265.13(b) and OAC 3745-65-13(B).
2. Facility has not maintained a written operating record as require by OAC 3745-65-73 and 40 CFR 265.73.
3. Facility has not conducted daily inspections of container storage areas for spills as required by 40 CFR 265.15(b)(4) and OAC 3745-65-15(B)(4).
4. Facility has failed to establish financial assurance for closure as required by OAC 3745-66-43 and 40 CFR 265.143.
5. Facility does not have a written inspection schedule as required by OAC 3745-65-15 and 40 CFR 265.15.

6. Facility failed to obtain a detailed chemical and physical analyses of hazardous wastes stored at the facility, in violation of 40 CFR 265.13(a) and OAC 3745-65-13(A).
7. Facility has stored hazardous wastes on-site in excess of allowable generator time limits without first having obtained a hazardous waste installation and operator permit from the Hazardous Waste Facility Board, in violation of Ohio Revised Code Section 3734.02(F).

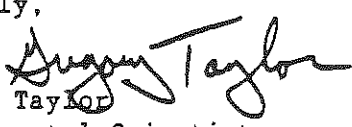

The facility is liable for compliance with applicable State and Federal Treatment, Storage and Disposal Regulations until such time as when the facility has returned to a generator status.

During the inspection a drum of Toluene dated January 4, 1989, was discovered in the drum storage area near the receiving dock this waste exceeded the permissible 90 day accumulation time of hazardous wastes for generators. A generator who accumulates hazardous waste for more than 90 days is an operator of a storage facility and is subject to the requirements of 40 Code of Federal Regulations (CFR) Parts 264 and 265 and Chapters 3745-54 through 3745-58, 3745-65 through 3745-69 of the Ohio Administrative Code (OAC) and the permit requirements of 40 CFR 270, OAC Chapter 3745-50 and Section 3734.02(F) of the Ohio Revised Code. Vernitron Piezoelectric must therefore submit in the amended closure plan that addresses the outside drum storage area procedures addressing the clean closure of the inside drum storage area. The appropriate copies of the amended closure plan must be submitted to Tom Crepeau by September 8, 1989.

Please note that the Land Ban Restriction Inspecting, completed as part of this inspection is being forwarded to the U.S. EPA, Region V for appropriate follow-up.

If you have any questions concerning the requests or violations cited in this letter, please feel free to contact me at (216) 425-9171.
